# About Us

**Daedal Technologies Limited (DTL)** is a fully-owned Nigerian company that provides full range of services and holds strong EPCIM (Engineering, Procurement, Construction, Installation and Management) expertise to the oil and gas industry with assistance for project conceptualization, operations and commissioning.

At all levels, **DTL** strategic alliances and technical associations have been based on the changing dynamics for Oilfield Services provision in Nigeria, in particular the increasingly “energy value chain” nature of the industry in the country and our long-term strategy of vertical integration, to position us to support clients through the lifecycle of assets-through the development of conceptual designs, detailed engineering, marine, construction and construction management, installation, instrumentation, pre-commissioning, commissioning, operations and maintenance and facility decommissioning.

# Our Vision

To be the leading integrated Energy, Manpower and Engineering Technology provider In Africa.

# Our Mission

To continuously strive to improve on the quality of the services we render to our clients using the right People, Processes and Technology.

# Core Values

- Customer Orientation
- Leadership
- Integrity
- Innovation
- Teamwork

# Services

**Daedal Technologies Limited** is one stop point for all human resources and engineering technology solutions in the complete energy value chain which includes but not limited to oil & gas, energy sector, marine, civil engineering and construction including maintenance management of energy sector, marine, and civil, procurement, infrastructure development & manpower supply.

**DTL** is a prominent solutions provider in the energy sector with assistance for project conceptualization, operations and commissioning. We provide finest in class cost conscious and revenue oriented solutions to all business necessities relating to the energy sector through our proficiency, professionalism and ethos.

Our professionals and collaborators have a vast experience in the areas of project initiation, expansion and start-up of amenities which touch every characteristic of the energy value chain from hydrocarbon exploration, transport and refining to harnessing renewable sources of energy.

We imbibe a special focus on operations and maintenance of services using our vast industry exposure and appreciative knowledge of all business processes and needs. Starting from project feasibility study to its development and commission; the team at DTL assists our clients in an extremely professional manner with complete accountability and belief.

At **Daedal Technologies Limited** we are enthusiastic to stretch the frontiers of growth and development of the energy sector, civil construction, procurement & manpower by providing cutting edge solutions to the business needs of our clients but not limited to West Africa only.

## OPERATIONS AND MAINTENANCE SERVICES

At Daedal Technologies Limited we provide the following Oil & Gas Facilities Management Services:

- Plant Rehabilitation
- Scaffolding Services
- Inspection Services
- Painting and Coating Services
- Grit Blasting
- Hydro Blasting
- Non Destructive Testing
- Corrosion Control Services.

## ENGINEERING, PROCUREMENT, CONSTRUCTION, INSTALLATION AND COMMISSIONING SERVICES

Daedal Technologies Limited provides quality turnkey services for most industrial projects. Our unique ability to provide seamless integration of engineering, procurement and construction services throughout all phases of a project allows us to ensure our clients:

- Lower overall project cost
- Advanced costs controls
- Reduced project schedule
- Overall project safety and quality
- Single point of contact and responsibility

At Daedal Technologies Limited we pride ourselves on our ability to provide the highest level of engineering, procurement, construction, installation and commissioning services to clients for their complex project investments.

We leverage our world-class engineering resources, procurement network, and local Nigerian construction management services with our planning and scheduling expertise to realize success for our customers. We stand out for our ability to get the job done to the highest quality standards.

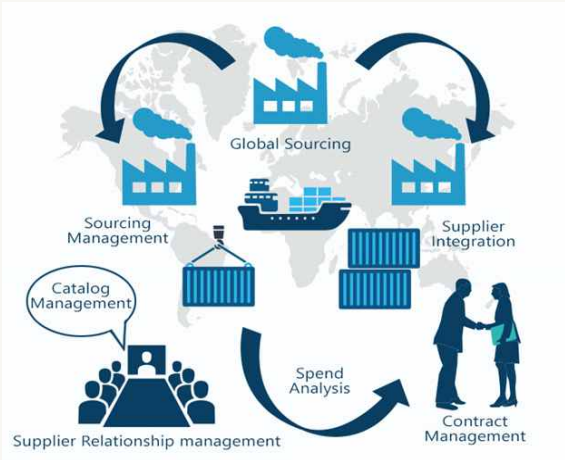

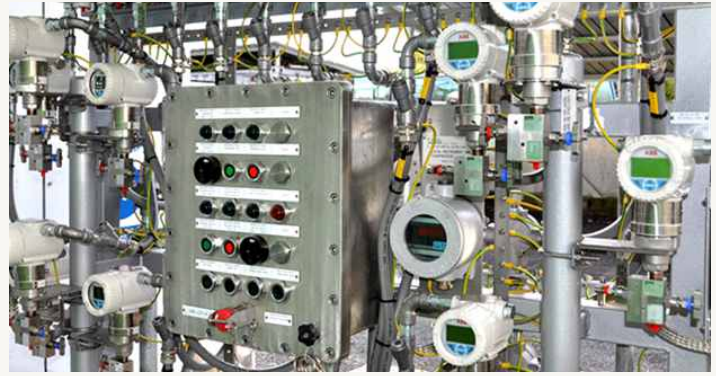

We provide the following services:

- Engineering (Onshore/Offshore)
- Electrical and Instrumentation Services
- Automation and Control Services
- Package, Mobile Sub-Stations and Injection Sub-Station

- Procurement, Export/Import Facilitation and Coordination
- Supply Chain Management and Oil & Gas Sector Logistics Support Services
- Construction, Fabrication and Construction/Fabrication Management
- Installation and Commissioning Services (Onshore/Offshore)
- Offshore Accommodation Support Vessel Services
- EPCI and EPCM on a Turnkey Basis

## TECHNICAL MANPOWER SERVICES

At Daedal Technologies Limited we specialize in Manpower Placement and Support which cuts across the oil and gas industry value chain, through exploration, asset development-drilling and reservoir management, production, including the development of production facilities, refining, primary distribution and terminalling.

We are able to supply multi-discipline project teams cutting across all these areas depending on the phase of client projects.

DTL guarantees rapid turnaround time, from initial identification of Client's specific search need, to actual placement of contractors on the work site.

Beyond hiring and placement of personnel, we provide cost effective support services such as Accommodation and Hoteling, Transport Services, Medical Registration and Evacuation, Administrative and other forms of logistic support which helps to optimize the overall cost of personnel to client projects, helping them to maintain the critical resourcing balance on projects at the very best prices.

### *OUR SCOPE OF SERVICES INCLUDES THE FOLLOWING:*

- Recruitment, covering Manpower search and Placement Services
- Payroll Management, covering timesheet handling, processing, transfers to personnel accounts, tax administration
- Provision of Accommodation for Personnel
- Transportation
- Procurement of work permits and visas
- Facilitation of Local and International Travel
- Medical Testing, In-country treatment and Medical Evacuation
- Background Checking and Verification of Personnel details, etc.
- Database Management

**We also provide the following services:**

- Database Management
- Personnel Administration
- Consular Services
- Fleet Management Services
- Accommodation Services
- Manpower Supply
- Recruitment Supply

## MARINE SUPPORT SERVICES

Daedal Technologies Limited through its strategic alliances and technical associations in the Marine Sector provides wide ranging Vessel Management and Associated Tools and Support to clients operating Shallow to Deepwater Assets in Nigeria and Africa.

At DTL our Services target different phases of the Oil and Gas Value Chain and other related Services consist of the following:

### **Drilling and Completion**

- Provision of Remotely Operated Vehicles

### **Construction and Installation**

- Provision of Offshore Accommodation Support Vessel Services
- Provision of Heavy Lift Vessel Services
- Provision of Construction Support Vessel Services
- Provision of Remotely Operated Vehicles
- Installation of Vessel Monitoring System

### **Operations and Maintenance**

- Air Diving Services
- Saturation Diving Services
- Provision of Remotely Operated Vehicles

### **Transportation**

- Provision of Fast Support Intervention Vessel Services

## SUBSEA LIFE OF FIELD SERVICES

Daedal Technologies Limited Life of Field Service Solutions are integrated, comprehensive and provide greater value and reduced ownership costs to our clients. Our range of services are aimed at Optimizing Project Delivery Costs (OPDC) to our clients during Pre-Installation activities, improving or sustaining production levels and extending the life of deepwater installations. They include the following:

- Provision of ROV and associated tools
- Flow Assurance Services
- Installation, Workover and Control Systems (IWOCS)
- Subsea Pipeline Repair
- Asset Integrity Services
- Diving Support Services
- Provision of Communications Solutions
- Asset Tracking
- Underwater Survey and Mapping Services
- Dredging
- Umbilicals
- Pipe Recovery, On-site machining and cutting
- Production String Recovery
- Inspection
- Services
- Maintenance and Repair Services
- BOP intervention and Control Systems
- Subsea Valves-Hydraulic Directional Control Valves (HCV), Subsea Control Units, Rotary
- Valves and Chemical Injection Throttle Valves (CTV)
- Riserless Well Intervention Services
- Subsea Pig Launchers and Risers

## HUMAN RESOURCES FUNCTIONAL OUTSOURCING

At Daedal Technologies Limited, our services include;

- I. Drafting of contracts of employment in line with the Nigerian labour laws and client/industry peculiarities.
- II. Conducting background checks on candidates before commencement of employment or confirmation of the candidates.
- III. Payroll management and administration.
- IV. Group life assurance policy arrangements.

At Daedal Technologies Limited we provide good quality residential accommodation and guest houses in Port Harcourt and other major cities in Nigeria for our clients in construction, oil and gas sectors whose personnel are on time-off.

We maintain relationships with the best residential accommodation property owners/agents and frequently screen and rate various residential property in accordance with internationally recognized standards.

DTL accommodation services include:

- Provision of Remotely Operated Vehicles
- Interim living in hotels prior to accommodation arrangements
- Furnished accommodation in secured areas to meet any client specifications

## OUR EXPERIENCE

Daedal Technologies Limited boasts of one of the best track records for indigenous Nigerian companies engaged in the provision of integrated manpower support services and engineering technology solutions to the energy value chain, oil and gas industry in Nigeria. Our client list and the size and complexity of work undertaken have grown rapidly over the last few years.

At DTL we are increasingly focusing on small to medium scale operators who are largely uninhibited by Joint Venture Partnerships with the Government and other regulations and who are still in the development phases of their asset management lifecycle.

Our business development strategies are driven by a need to drastically reduce the proportion of our annual earnings that is based on the outcome of competitive bid processes. We also similarly seek to leverage strategic alliances and subcontractor relationships as a means of entering into new client relationships, reducing our direct dependence on the bid process.

## OUR TECHNICAL PARTNERS

### **INTECH PROCESS AUTOMATION**

Daedal Technologies Limited have a Strategic Alliance Partnership with INTECH PROCESS AUTOMATION a renowned system integrator and automation solution provider for the oil & gas sector globally. Over the course of more than 20 years INTECH has transformed into a global organization with 350+ employees, 13 regional offices across four continents, 15+ nationalities, and an automation products & solutions portfolio that spans the entire lifecycle of an oil & gas asset.

INTECH has helped major Oil & Gas End Users to solve their most pressing issues of Instrumentation, Control & Electrical automation. INTECH's broad automation solution product portfolio, technical skills, knowledge & expertise on equipment of all major OEMs and its asset-application specific approach to solution design is what differentiates it from a typical system integrator.

The full Scope of Services delivered through this alliance arrangement, working exclusively for Nigeria energy value chain, oil and gas sector include:

- Integrated Control Systems (ICS)
- ICE - Instrumentation, Control & Electrical
- Wellhead Solutions
- Optimization and Maintenance Services
- Metering, Storage & Fuel Systems
- Advance Software Solutions
- Oil and Gas Applications

## HYPERLINK TECHNOLOGIES LIMITED

Daedal Technologies Limited have a Strategic Alliance Partnership with HYPERLINK TECHNOLOGIES LIMITED a System Integrator, Network Management Solutions and IT Consulting Company in Nigeria with over 23 years of conjugate experiences with specialty in networking, connectivity, cabling, enclosures etc. HYPERLINK TECHNOLOGIES also install Surveillance, Security, and Access Control Systems and Sales of Computers, Notebooks, Printers UPS etc. Apart from Hardware, HYPERLINK also specializes in Software Development, Internet Service, Cloud and Data Management Solution with major OEM Partnership of global Technology Companies.

The company holds a unique position in the international market offering a complete range of services not limited to:

- Integrated Control Systems (ICS)
- Enterprise Network Infrastructure
- Enterprise RFID Based Solution
- World Class Data Infrastructure
- Enterprise Security Solutions
- Enterprise Power Solution
- Advanced Business Telephone Solution
- Enterprise Business Applications and Software Development

## JIBS ENGINEERING SERVICES LIMITED

Daedal Technologies Limited have a Strategic Alliance Partnership with **JIBS ENGINEERING SERVICES LIMITED** an indigenous Engineering Services Company with 22 years of competence capable of handling every conceivable type of projects in the electrical engineering, energy value chain and allied fields. JIBS is one of the leading companies in Nigeria is in partnerships with Marelli Motori, ABB and British Safety Council in providing electrical and mechanical engineering services that enable utility and industrial customers improve their performance while lowering negative environmental impact. We have acquired a reputation in the industry for applying the most exacting international standards to all our projects, regardless of size, a factor which is largely responsible for our success as well as our decidedly bright prospect for the future.

The full Scope of competent services delivered through this strategic partnership, working exclusively in Nigeria are as follows:

- Package and Mobile Sub-Station
- Electrical and Machines System
- Project Management
- Instrumentation and Electrical Designs
- Instrumentation and Control
- Integration and Equipment Designs

## POLICY

The Management of Daedal Technologies Limited realizes that the objectives of the company will be achieved through provision of best quality products and services, insistence on operational compliance with international standards of safety, emphasis on human capital capacity development and effective financial management resulting in solid earnings and growth.

Daedal Technologies Limited aims to safeguard its long-term business prospects through a balanced strategy that ensures a basic cash flow combined with an assessed exposure to its target markets.

The company has a clear goal of improving its performance with regards to health, safety and environment both on-site and off-site. The company's customer-focused strategy is to exceed customer's expectations with formulation and compliance of its statutory policies.

## OUR QUALITY MISSION

Daedal Technologies Limited is committed to adopt and maintain a total quality approach at every step. Clear cut quality objectives driven by organizational excellence at DTL and our quality culture encourages us to confidently meet the expectations of internal and external stakeholders.

In principle, our Quality Mission shall contribute to us achieving the following objectives; to satisfy our client by high quality services, well-engineered and cost effective solutions for their projects, and performing our work on schedule.

For us, quality is not a subjective matter. Rather it is about ensuring that our products and services consistently meet all specifications agreed as being right. We do not regard the quest for quality as an additional overhead burden since we take into account practicability and affordability. Our approach, which seeks to avoid mistakes and improves efficiency, is to “do it right the first time”.

We also recognize that you cannot build quality into product since quality results from an attitude of the mind. This principle which is one of the pillars of our Quality Management System is inculcated in all our workers.

***N/B: A comprehensive manual of our Quality Assurance management policy is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## COMMUNITY DEVELOPMENT POLICY

In order to improve the quality of life in host communities, the company shall

- Establish a Community Development program, which applies World Standard of practice to serve its host communities.
- Work in partnership with host communities and where appropriate with Government, donors, non-governmental organization, community based groups and other stakeholders.
- Encourage the full participation of host communities in project planning, implementation and monitoring.
- Maintain communication with all social segments of host communities in order to address their needs.
- Focus Community Development Assistance on activities having high impact and broad benefits for the host population.
- Co-operate and develop interface with the client and third parties to avoid unnecessary delays, shut down and of course unwarranted loss of man hours
- Prior to mobilization/movement to any locality, pay a visit to the community chiefs and leaders.
- Report community disturbance or threat to its client without delay...

***N/B: A comprehensive manual of our CASHES management system is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## ENVIRONMENTAL POLICY

The policy in **Daedal Technologies Limited (DTL)** concerning immediate environment is to impact on it **AS LOW AS REASONABLY PRACTICABLE (ALARP)**, so as to achieve a sustainable development in its entire ramification. Implications of our policy are:

- DTL plans and handles all her activities in such a way that her operations will not jeopardize natural resources.
- DTL cares, and prepares Environmental Management Plan (EMP), integrate EMP into project life cycle and will adopt good housekeeping before, during and after our project.

DTL operates in all projects so as to reduce:

- Ozone layer depletion.
- Global warming
- Occupational/General health problems.
- Contamination of surface/underground water
- Flooding and erosion
- Destruction of aquatic life.
- Filtration of water bodies.

***N/B: A comprehensive manual of our CASHES management system is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## WASTE MANAGEMENT POLICY

To achieve and maintain high standard of protection of life and property as well as proper disposal of wastes generated from our services some which are toxic, Daedal Technologies Limited shall;

- Segregate wastes at source using appropriate wastes bin where the need arises.
- Careful handling of Toxic wastes generated from our services from cradle to disposal
- Proper completion of waste management guideline as may be directed by our client
- Adequate Management of wastes from source to disposal
- Accountability for all wastes generated on proper handling and disposal.
- Wastes classification and options for reduction, recycling, treatment and responsible disposal.

***N/B: A comprehensive manual of our Waste management policy is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## OCCUPATIONAL HEALTH AND SAFETY POLICY

All staff of Daedal Technologies Limited shall be medically fit and remain fit throughout their employment. The company shall maintain insurance against any liability that may result in the event of any personnel suffering occupational disease or impairment to health.

Company's retained clinic shall handle all routine Medicare and emergencies. Health monitoring of all staff shall be a routine affair to ensure the continued fitness of all staff. First aid box manned by a certified first aider will be provided for each crew and base. Records of medicament or injuries treated must be documented.

***N/B: A comprehensive manual of our CASHES management system is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## SECURITY POLICY

**Daedal Technologies Limited** has it as a policy and function to manage security affairs as an integral part of its overall HSE program and indeed part of the company's business so as to minimize the number of security related incidents for all staff, clients and third party personnel involved in her operations.

To ensure the implementation of this policy, the company shall engage adequate number of trained security personnel. The company shall engage a chief security officer (CSO) as middle management personnel who would organize, co-ordinate and implement all the company's security ideals and programs. All incidents shall be reported to client and the police.

At project locations, local security men shall be used to protect the company's equipment and facilities in a bid to forge good rapport between the company and host community. Essential work gadgets such as mobile radios, torches, uniforms, Rain-coats, shall be provided to enhance their services.

Security policy must be reviewed in site/management HSE meetings. Security training/drills shall be conducted for increased security awareness.

The chief security officer (reports to the HSE manager) shall be the focal point and act in concert with relevant departments in the realization of set security objectives and targets. He shall develop database for enhanced management of security.

***N/B: A comprehensive manual of our CASHES management system is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## COMMITMENT TO ISO 14001

Daedal Technologies Limited (DTL) is committed to achievement and implementation of ISO 14001 Targets: This implies that:

- DTL shall comply with the standards of ISO and as well as comply with any other requirements or environmental standards that we set for ourselves.
- We must identify all clients' environmental aspects or hazards and put controls.
- We must prioritize the aspect so that we can concentrate on the ones that have the greatest environmental impacts.
- We must develop programs and plans to improve our environmental performance based on these significant aspects.
- We must set environmental targets and objectives.
- We must monitor, measure, and control emission and discharges associated with the aspects.
- We must have internal audit and management review program.

## HSE AUDIT POLICY

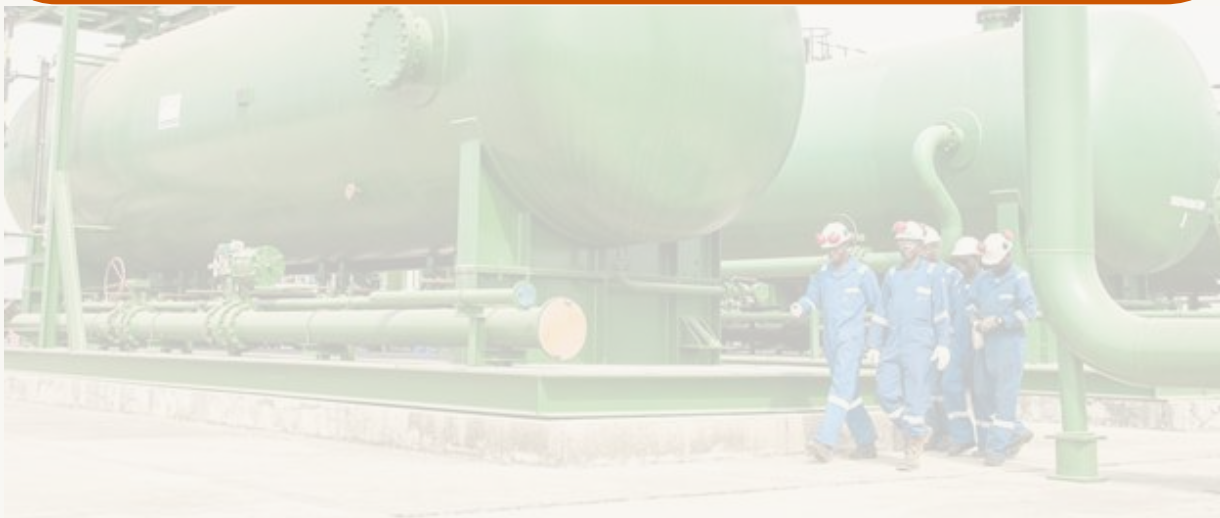

As part of Daedal Technologies Limited continual improvement of our Health, Safety and Environment Management System, HSE Audit will be conducted on a regular basis. This is to ensure that;

- Our HSE Management System remains continuously relevant and suitable to our business activities;
- Our HSE Management System has been properly implemented and maintained; and
- Our HSE Management System has been effective in meeting the requirements of our HSE Policy and achieving our HSE Objectives

The HSE Audit shall NOT BE used as a "Fault Finding Exercise" but as part of the HSE Management System continuous improvement process.

All those involved in the HSE Audit process shall allocate the time and effort in order to achieve the HSE Audit objectives. Resources will be put in place to ensure the HSE Audit findings and recommendations are satisfactorily closed.

*N/B: A comprehensive manual of our CASHES management system is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.*

## EQUIPMENT MAINTENANCE POLICY

All equipment will be regularly maintained. All unserviceable equipment shall be Locked Out and Tagged Out (LOTO).

The objective of such routine preventive maintenance is to reduce equipment downtime and lost time incidents resulting from lack of maintenance culture. Routine maintenance and minor repairs shall be undertaken at the work site while serious maintenance of completely broken down equipment shall be done at the base. Turn around maintenance shall be planned and executed once a year. The aim being to put all equipment in serviceable order for hitch free operation/use. It is mandatory that equipment operators report immediately any break down or faults observed in their equipment. Late reportage of faults shall be met with appropriate reprisals.

Toolbox meetings on proposed equipment maintenance MUST precede the maintenance work planned for each day. All maintenance crew must be trained and only experienced personnel shall be job place and authorized to carry out maintenance of company equipments.

All maintenance work shall be carried out in accordance with the Company's safety maintenance procedures. The maintenance crew must be briefed before each maintenance episode.

The implementation of the maintenance policy shall be the responsibility of the maintenance Engineer, who would report to the Base/Facilities Manager/Project Manager.

***N/B: A comprehensive manual of our Quality Control management policy is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## PROCUREMENT POLICY

The procurement strategy of **Daedal Technologies Limited** is focused on the most expeditious method for obtaining the required equipment and materials within budget and agreed schedule that meets international best practices, designs and quality standards;

- We will guarantee the availability of OEM parts for the Supply Chain activity.
- We will purchase the equipment & spares directly from the OEM and Company reserves the right to reject any part without a proof of evidence.
- We will deliver all materials within stipulated date that shall be agreed with company during our kick off meeting.
- v All parts shall be delivered with the evidence of procurement from OEM or
- OEM dealer and the parts must be covered by the manufacturer warranty for a minimum period of three months from the date of supply.

***N/B: A comprehensive manual of our Procurement Policy is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## LOCAL CONTENT POLICY

Our Nigerian local content policy aims to optimize the participation of indigenous staff, manufacturers and service providers in the oil and gas sector by creating sustainable employment and economic development opportunities for Nigerians. We utilize the maximum number of goods, services and manpower sourced locally for all our operational needs and requirements. As an indigenous company, we are committed to provide appropriate training and development programs to equip Nigerians with the requisite skills and competencies required to support our operations and meet our policy objectives.

Daedal Technologies Limited shall be committed to the following:

- Act as responsive and responsible corporate citizen of the Federal Republic of Nigeria.
- Encourage and support the transfer of skill and technology and provide appropriate training for our employees to increase the competency levels of all those involved in our operations.
- Promote purchasing policies that give preferential status to local manufactured products and services.
- Increase local value-added content and contribute to the development of the national economy and all stakeholders involved with our organization.

***N/B: A comprehensive manual of Nigerian Local Content Policy is available and can be gotten through our office or contact numbers as appearing on the contact page of this profile.***

## OUR TEAM

Our team consists of highly trained and efficient individuals managed by an array of qualified and seasoned professionals.

At **Daedal Technologies Limited** we have an excellent team of experienced personnel to handle projects from commencement to completion as we aim to achieve high standard of practice in all our projects.

In order to achieve the objectives for which it is established, **Daedal Technologies Limited** has assembled seasoned Professional Engineers and Technicians backed with Directors and Managers comprised of successful Entrepreneurs that have distinguished themselves in various fields of human endeavor. This collection of erudite Managers, Engineers and Technicians effectively brought together within the Management Structure has given the Organization the character of dynamism and versatility required to cope with all the demands of the business of the company.

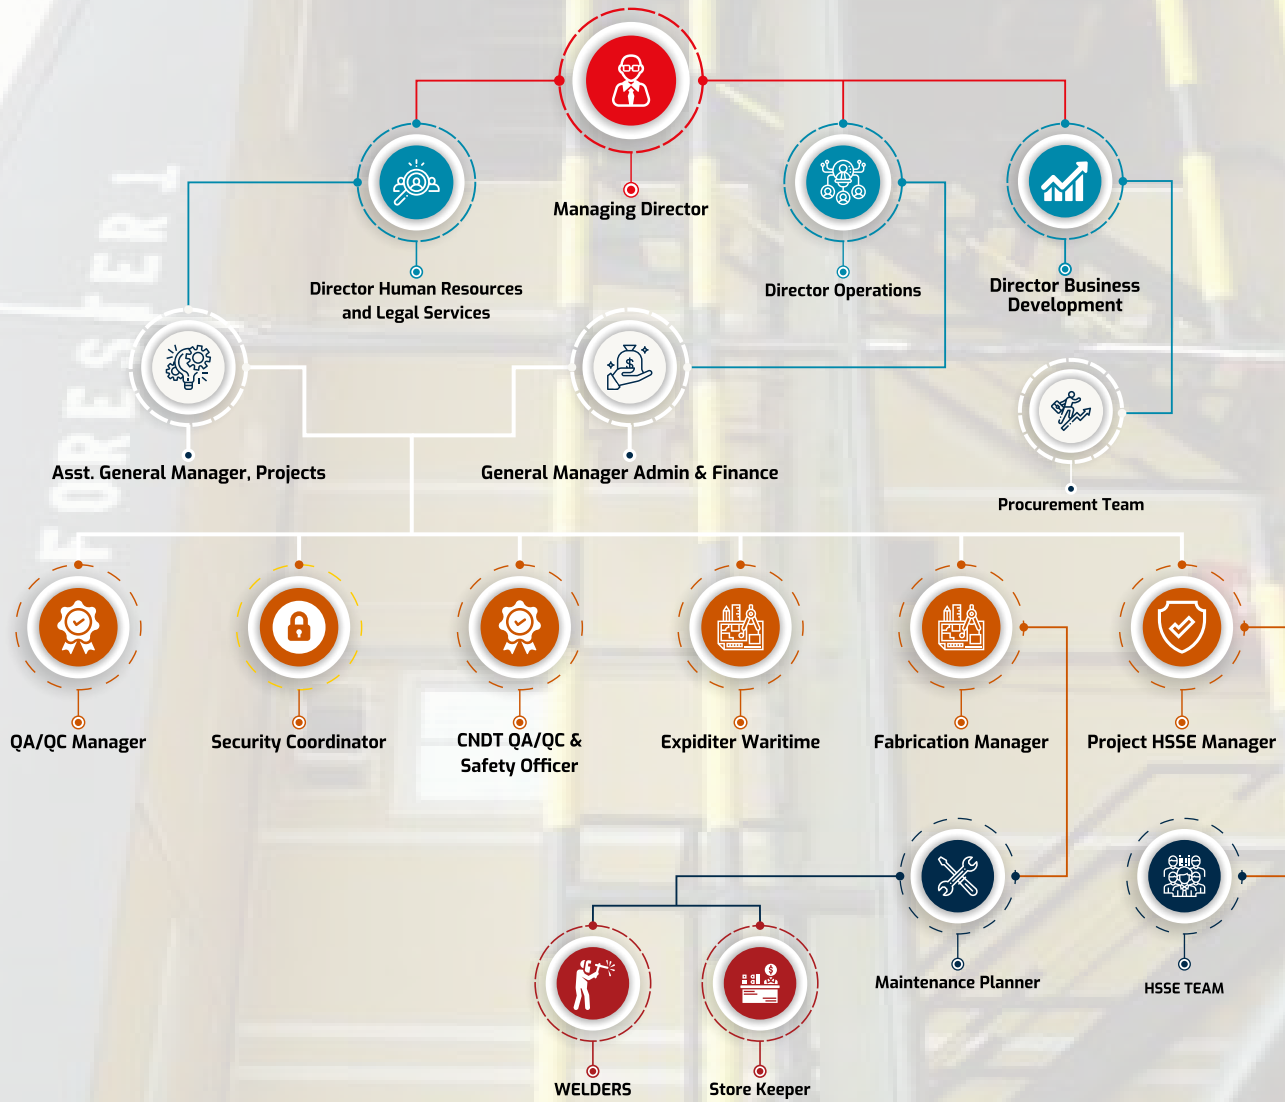

## ORGANOGRAM/ORGANIZATIONAL STRUCTURE
